

Le tableau ci-dessous fournit la liste des 500 premières pages visitées ou les 500 premiers documents téléchargés au cours de la semaine allant du 9 au 13 mai 2010.

La troisième colonne donne le nombre de visites ou téléchargements, la colonne suivantes indique le nombre de pages lues. Les autres colonnes ne présentent aucun intérêt.

Par exemple la page Index.html a été visitée 305 fois et 445 pages ont été visionnées.

Cela vous donne une petite idée de l'intérêt que portent les militants aux différents documents qui figurent dans le site. Que les documents les plus récents ne figurent pas forcément dans cette liste n'a rien d'étonnant, cela provient du fait que les militants les ont déjà téléchargés ou qu'ils ne les ont pas intéressés.

Ce tableau a été réalisé à partir des données fournit par le logiciel Urchin v6.602 qui figure parmi les plus performants. Il fournit un tas de statistiques, mais je n'ai pas trouvé celle qui me permettrait de déterminer exactement combien d'internautes différents se connectent au cours d'un mois.
